- Power supply for metal halide AC-lamps or DC-lamps
- Lamp power range of 350 W, 400 W, 500 W, 575 W, 600 W, 700 W, 800, 850W
- Output power customer selectable by 16-step multimode switch
- integrated lamp lifetime counter -as option-
- Input voltage range from 90 V AC to 264 V AC, power factor corrected line input
- Special newly designed anti aging and anti abnormal arc control circuit for high optical reliability over extended lifetime
- μ P controlled, digital power management with high output stability over lamp lifetime
- Output short circuit protected
- Thermal shut off at 90°C
- Shut off function for end of life and lamp fail parameter
- Less than 1% rms light flicker at all frequencies
- Auxiliary regulated 24 V / 0.1 A output for fan drive, (only available when lamp lit.)
- optoisolated control interface with: lamp lit OK output, boost input, analog dim input (photofeedback), remote on-off input (invertable by solderbridge), non optoisolated direct uP-control
- Thermal design with integrated fans or for external cooling as option
- Flexible Design: new lamps and functions adaptable only by software

Please read this information carefully,
before installing and operating the power supply!
