## Power Supply for Xenon Lamps

### Features

- Power supply for metal halide short arc, low voltage DC-lamps
- Xenon and mercury, in the power range of 100 W to 300 W
- Output power customer selectable by 16 step-switch
- Certified by UL 60601, OSRAM and USHIO
- Input voltage range from 90 V AC to 264 V AC, power factor corrected line input, built-in EMI-filter: meets CE and FCC part "A"
- Special newly designed anti aging and anti abnormal arc control circuit for high optical reliability over extended life time
- $\mu$ P controlled, digital power management with high output stability over lamp lifetime
- Output short circuit protected and "Arc to Ground" protected
- Output galvanically separated to line input, thermal shut off at 90°C
- Shut off function for end of life and lamp fail parameter
- Less than 1% rms light flicker at all frequencies
- Auxiliary regulated 24 V / 0.2 A output for fan drive, (only available when lamp lit.)
- Flexible design: new lamps and functions adaptable only by software

Please read this information carefully,  
before installing and operating the power supply!
